

TRBOnet PTT Mobile Client

# What's New Release 3.0

# Revamped messaging

- You can respond to or forward a message.
- New message statuses: sent, delivered, read and error.
- Quick video and audio messages.
- Other improvements, such as online status of your contacts, message search, image preview, automatic attachment download.

# New file transfer

- Image preview.
- File size information.
- Auto download small files when you open the chat.
- Auto resume interrupted downloads.

# Quick video messages

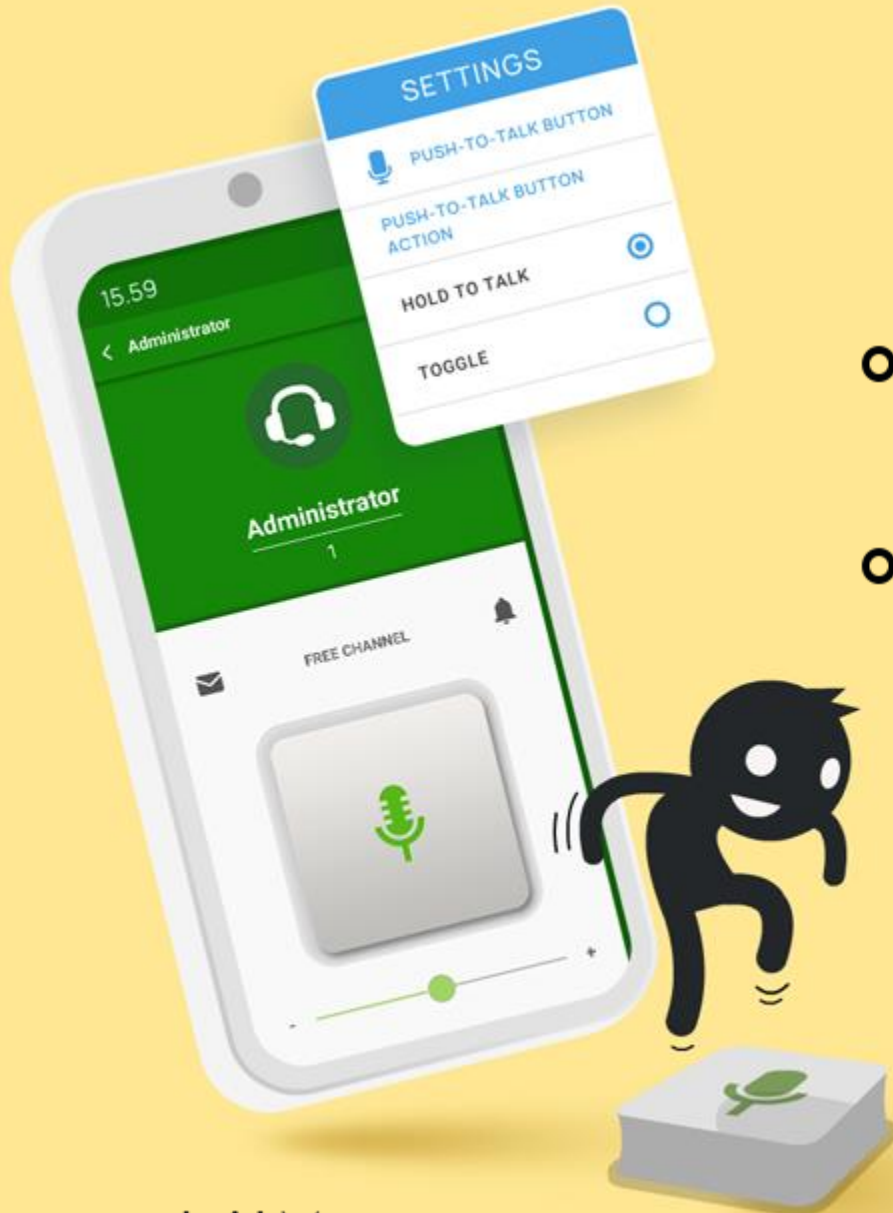

- Take a video and share it using the camera icon or within the chat.
- Videos are optimized for size and quality. A video message is limited to 2Mb, or 20 seconds in length.
- Received video messages are available within the chat.

# Push-To-Talk button mode

- Toggle - press once to talk and press again when you finish talking
- Hold to Talk - press and hold the button until you finish talking

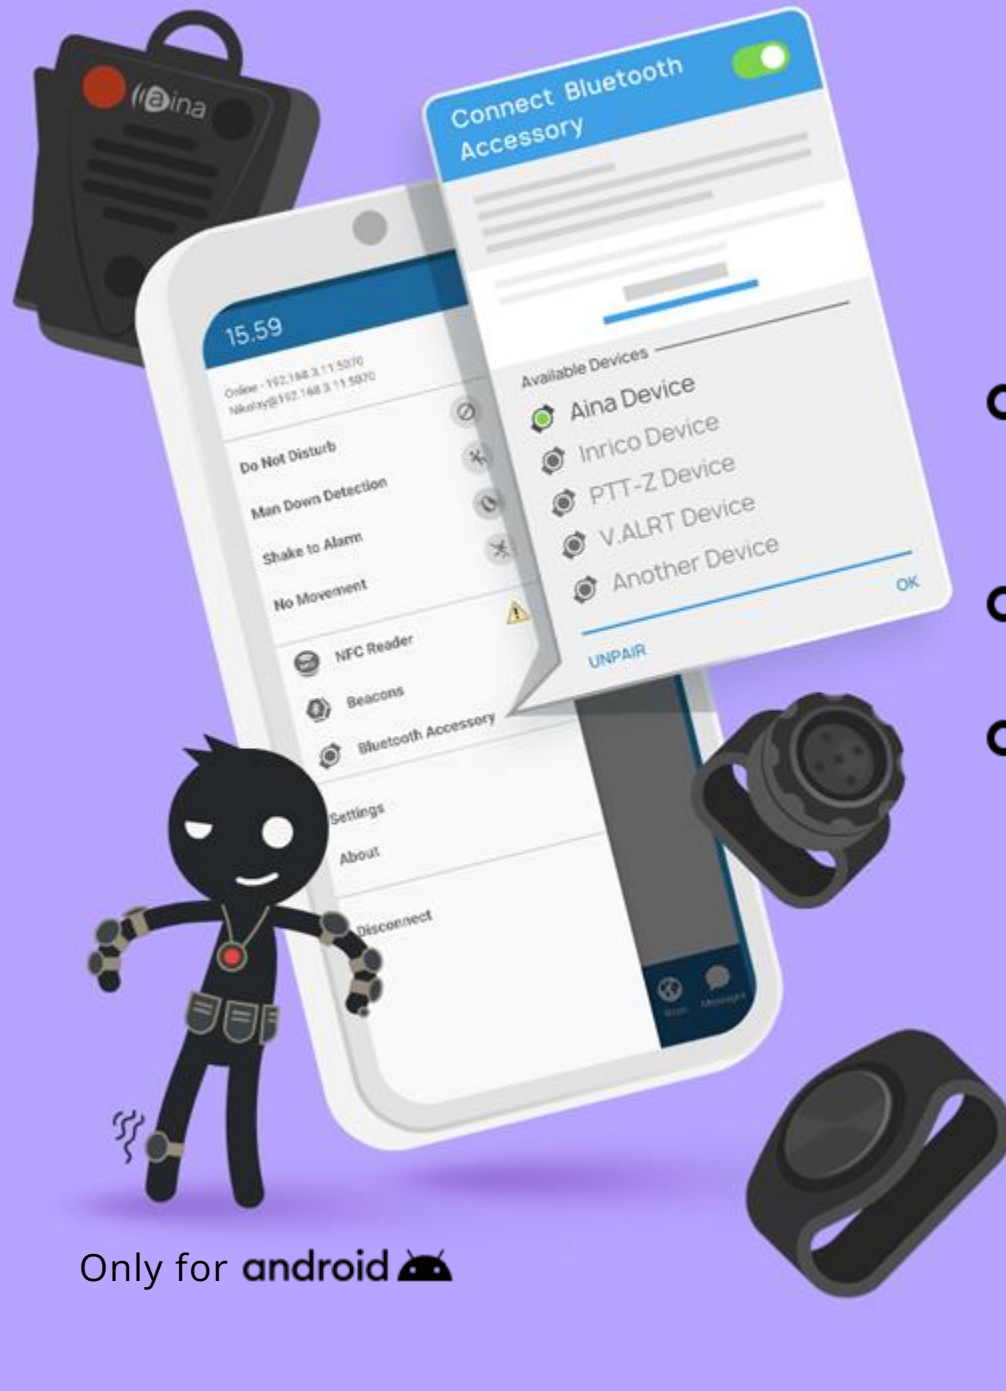

# Use wired headset buttons as Push-to-Talk

- Press answer/end button to transmit, press again to stop transmission. Press forward/backward button to change the home channel.

# Bluetooth accessories

- Select a Bluetooth SPP or LE device to connect to and remap the buttons if needed.
- Auto connecting to Paired Bluetooth accessories.
- For example, Bluetooth SPP (Serial-Port-Profile) devices - RSM (AINA, Inrico, etc), Bluetooth LE (GATT) devices - PTT buttons (PTT-Z, V.ALRT, etc).

# Remap buttons using key codes (added input devices)

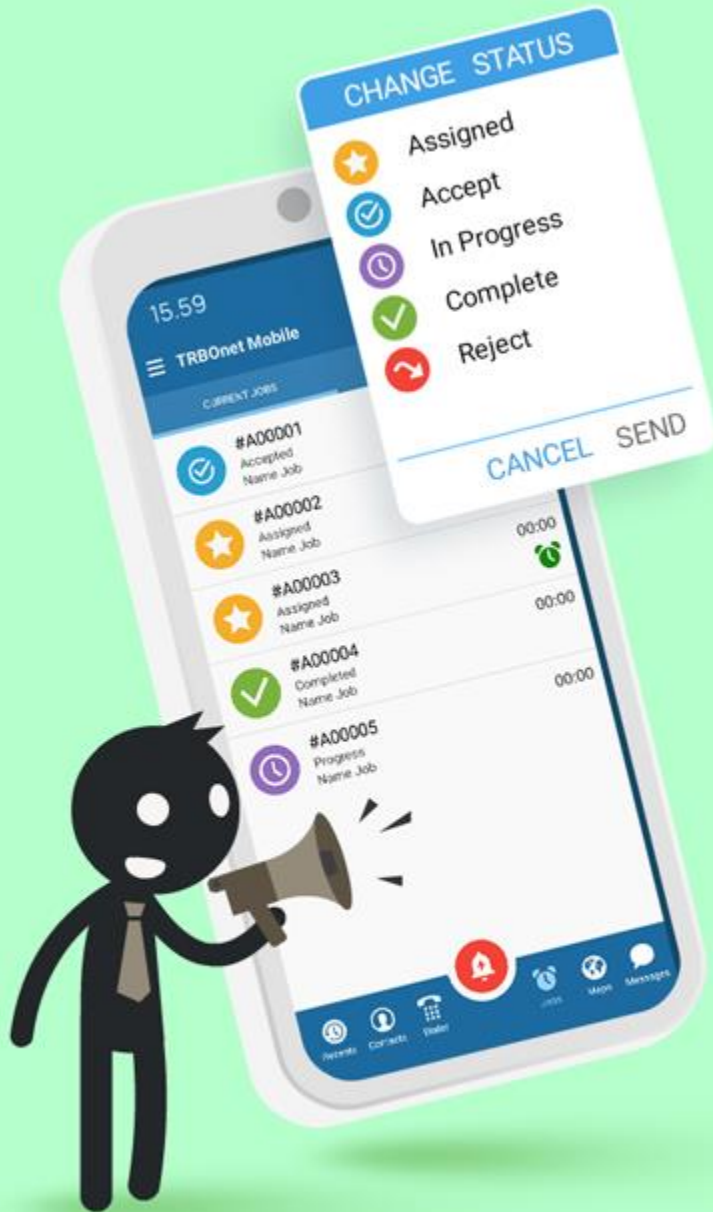

- Remap a smartphone physical buttons or USB OTG/Bluetooth input device buttons to execute an action.

# Improved task management

- Change the status of a task easily. The app will show available statuses depending on the current status.
- Overdue task indication.

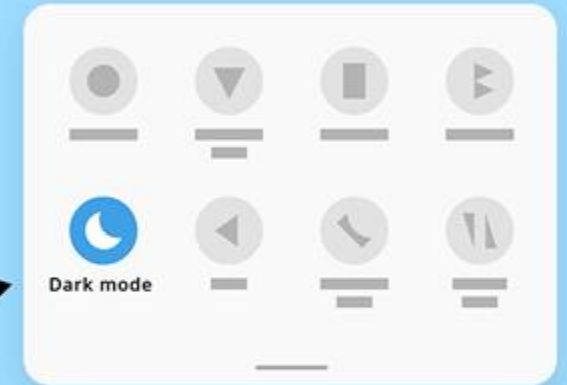

Only for **android** 

# Auto theme selection

- The application will turn on the light or dark mode depending on the system settings.

- You can choose between the light or dark mode, or system default in the app settings.

TRBOnet PTT Mobile Client

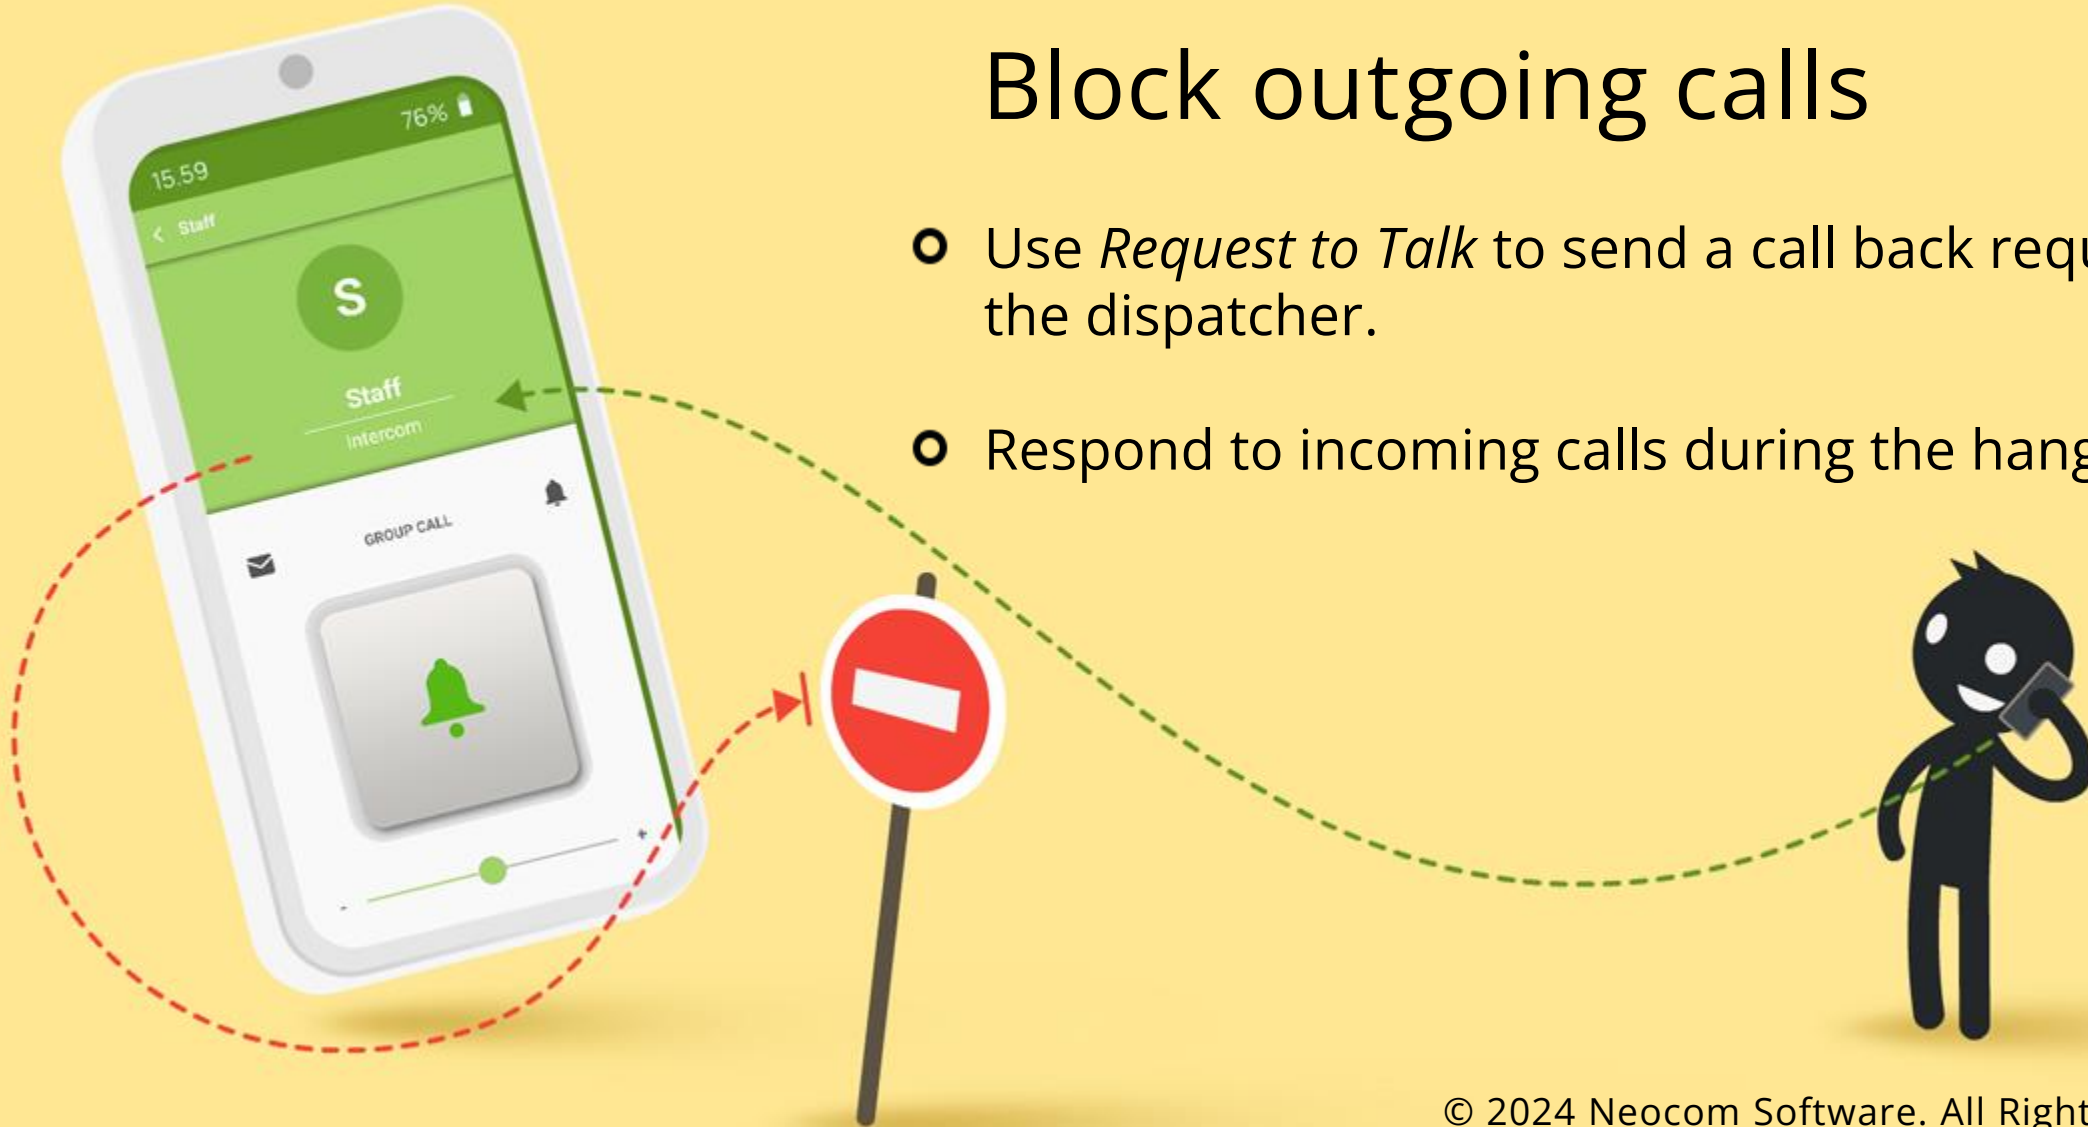

# What's New

## Release 2.9

# Block outgoing calls

- Use *Request to Talk* to send a call back request to the dispatcher.

TRBOnet PTT Mobile Client

# What's New

## Release 2.8

## NFC tags

- NFC tags can be placed on a map like normal iBeacons. When a mobile device detects a tag registered with TRBOnet, it will show on this tag.
- NFC tag IDs must have the following format:  
NSI#[major ID]:[minor ID]  
An NFC tag can be positioned on the map as an iBeacon with these major and minor IDs.
- The NFC mode must be activated, the application must run in the foreground and the device must be unlocked.

# Quick messages

- Pre-defined text responses to incoming alerts, RTTs and full-duplex calls [Android].
- Quick replies to incoming text messages.

Quick messages

I'll call you later.

I'll call you right back.

Can't talk now. What's up?
