

TRBOnet
6.0

Perfectly
Blended

MOTOTRBO™ R7 is a brand-new digital portable two-way radio that offers advanced audio capabilities. The new lineup includes three models to choose from. The top-tier full keypad version features a large 2.4 inch 320 x 240-pixel color display, providing users with the information they need at a single glance. Reading text and navigation of the menus is intuitive and fast, exactly what you want from a mission-critical device. The screen displays relevant information by default such as channel and a single button press allows users to get to commonly used actions with ease.

TRBOnet 6 offers the full support of R7 radios, including, but not limited to the following features*:

- ✓ Pure IP-based voice dispatch and recording
- ✓ Indoor and outdoor tracking
- ✓ Geofencing and location history
- ✓ Text messaging
- ✓ Job Ticketing
- ✓ Lone Worker

R7 radios support option boards* that significantly enhance their capabilities with the help of TRBOnet Option Board Software. The software enables the option board to gain access to location data, voice calls and the radio's accelerometer, which unlocks a few unique features:

- ✓ Store and Forward, location data are collected and compressed on the option board before being sent to TRBOnet
- ✓ Instant geofence alerts, configurable per radio
- ✓ Automatic channel change, location specific
- ✓ Voice recording
- ✓ Automated response to selected inputs
- ✓ Safety features, including Man Down, Crash and Rollover Detection, Lone Worker

Supported MOTOTRBO systems

- Conventional
- IP Site Connect
